## **ERRATUM**

Joint Public Notice MVN-2011-00224-WNN, dated February 7, 2011, described work proposed by Hunt Oil Company consisting of equipment access and removal of sections of existing out-of-service flowlines located in the Atchafalaya Basin Floodway, Myette Point Field, Attakapas Island Wildlife Management Area, Township 13 South, Ranges 9 and 10 East, approximately 3.5 miles northeast of Charenton, Louisiana, in St. Mary Parish. Temporary impacts were indicated as being approximately 3.35 acres. However, the maximum temporary impacts that would result from project implementation are approximately 9.94 acres. Therefore, due to this correction, comments will be accepted until **20 days** from the date of this joint public notice. As compensation for the unavoidable wetland impacts, the applicant proposes to allocate remaining available credits from the Attakapas Island Wildlife Management Area Mitigation Project, managed by the Louisiana Department of Wildlife and Fisheries, and approved by the Corps on August 27, 1997.

Ronnie W. Duke  
Chief, Western Evaluation Section  
Regulatory Branch
