Eastern Evaluation Section
Project Manager
Melissa Ellis
(504) 862-2543

SUBJECT: MVN 2010-2771-EQ

PUBLIC NOTICE

Interested parties are hereby notified that an application has been received by the District engineer for a Department of the Army permit to authorize the following pursuant to (X) Section 10 of the Rivers and Harbors Act of March 3, 1899 (30 Stat. 1151; 33 USC 403); and/or () Section 404 of the Clean Water Act (86 Stat. 816; 33 USC 1344).

**CONSTRUCT DOCK AND EXCAVATE FOR TWO BOAT SLIPS ON THE
TCHEFUNCTE RIVER IN ST TAMMANY PARISH, LOUISIANA**

NAME OF APPLICANT: Doug and Deborah DeRouen, c/o: North Shore Marine Contr. Inc., Frank Crain, Post Office Box 248, Madisonville, Louisiana 70447.

LOCATION OF WORK: On the right descending bank of the Tchefuncte River at 121 Riverdale Drive, Latitude 30.42408, Longitude -90.10747, Section 25, Township 7N, Range 11E, Covington, St Tammany Parish, Louisiana as shown on the enclosed drawings.

EXISTING SITE CONDITIONS: The project site consists of a single family home on 1.12 acres of which 0.01 acre are jurisdictional wetlands and 1.11 acres are uplands. All of the wetlands are located along the shoreline. The waterway in this area is approximately 400 feet wide.

CHARACTER OF WORK: The applicant is proposing to construct an 838 square foot dock, two boat slips with a three-sided, U-shaped wall to be constructed on the surround of the interior of the two boat slips. The applicant is proposing to excavate 80 cubic yards of material from 0.02 acres of water bottom for the boat slips. The applicant is also proposing to enlarge an existing pond in the uplands by excavating 175 cubic yards of material from the uplands. This pond is currently connected to the river through a swale. All excavated material will be used for fill in uplands at a residential development site located at 15096 Evergreen Loop in Covington. There is no known submerged aquatic vegetation in this area. No wetland impacts are proposed, therefore, mitigation is not required.

The comment period will close **15 days** from the date of this public notice advertisement. Written comments, including suggestions for modifications or objections to the proposed work, stating reasons therefore, are being solicited from anyone having interest in this permit request. Letters must reference the applicant's name and the subject number, be addressed and mailed to the above address, ATTENTION: REGULATORY BRANCH. **Individuals or parties may request an extension of time in which to comment on the proposed work by writing to the project manager or clicking on the project manager's name on the public notice grid on the web page. Any request must be specific and substantively supportive of the requested extension, and received by this office prior to the end of the initial comment period. The Section Chief will review the request and the requestor will be promptly notified of the decision to grant or deny the request. If granted, the time extension will be continuous to the initial comment period and, inclusive of the initial comment period, will not exceed a total of 30 calendar days.**

The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit which reasonably may be expected to accrue from the proposal must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, consideration of property ownership and, in general, the needs and welfare of the people.

The Corps of Engineers is soliciting comments from the public; federal, state, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

No properties listed in the National Register of Historic Places are near the proposed work. The possibility exists that the proposed work may damage or destroy presently unknown archeological, scientific, prehistorical or historical sites or data. Copies of this notice are being sent to the State Archeologist and the State Historic Preservation Officer.

Our initial finding is that the proposed work would neither affect any species listed as endangered by the U.S. Department of Interior nor affect any habitat designated as critical to the survival and recovery of any endangered species.

This notice initiates the Essential Fish Habitat (EFH) consultation requirements of the Magnus-Stevens Fishery Conservation and Management Act. The applicant's proposal would result in the destruction or alteration of 0.02 acre of EFH utilized by various life stages of red drum and penaeid shrimp. Our initial determination is that the proposed action would not have a substantial adverse impact on EFH or federally managed fisheries in the Gulf of Mexico. Our final determination relative to project impacts and the need for mitigation measures is subject to review by and coordination with the National Marine Fisheries Service.

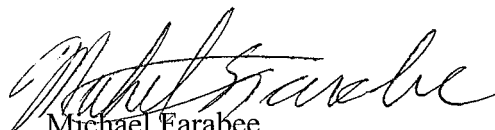

If the proposed work involves deposits of dredged or fill material into navigable waters, the evaluation of the probable impacts will include the application of guidelines established by the Administrator of the Environmental Protection Agency and certification that the proposed activity will not violate applicable water quality standards will be required from the Louisiana Department of Environmental Quality, before a permit is issued.

The applicant has certified that the proposed activity described in the application complies with and will be conducted in a manner that is consistent with the Louisiana Coastal Resources Program. The Department of the Army permit will not be issued unless the applicant receives approval or a waiver of the Coastal Use Permit by the Department of Natural Resources.

Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider this application. Requests for public hearings shall state, with particularity, the reasons for holding a public hearing.

You are requested to communicate the information contained in this notice to any other parties whom you deem likely to have interest in the matter.

The applicant has certified that the project will be conducted in a manner that is consistent with the Louisiana Coastal Resources Program.

Michael Farabee
Chief, Eastern Evaluation Section
