NOTES:

General Background: This levee was reconstructed in 2005-2006 to elevation 8.0'. In 2008, a maintenance lift was performed to restore the levee to elevation 8.0. The 2005-2006 levee was constructed with a 25 foot strip of marsh grass on the outside toe which functioned as the required mitigation for the project. This proposed levee footprint will impact this 25 foot marsh along the existing levee toe.

The recent levee lift (2008/2009) was permitted under P20090520 and MVN-2002-0777 WW.

Approximately 353,000 cubic yards of dirt will be hauled in and approximately 62,000 cubic yards of material will be borrowed from the existing levee to raise the levee to a +10.0' elevation.

Approximately 21.0 acres of wetlands and 5.2 acres of shallow water habitat will be impacted by this activity.

All access roads are existing/recently utilized during the recent levee lift.

As-built drawings will be submitted within 30 days of completion of this project to the Louisiana Department of Natural Resources, Office of Conservation, Pipeline Division, P. O. Box 94275 Baton Rouge, LA 70804, and to the Louisiana Department of Natural Resources, Coastal Management Division, P. O. Box 44487, Baton Rouge, LA 70804-4487.

All structures, facilities, well and pipelines/flowlines occurring in open water areas or in oilfield canals or slips shall be removed within 120 days of abandonment or the facilities for the herein permitted use unless prior written approval to leave such structures in place is received from the Coastal Management Division. This condition does not preclude the necessity for revising the current permit or obtaining a separate Coastal Use Permit, should one be required.

Structures must also be marked/lighted in accordance with U. S. Coast Guard regulations.

In order to ensure the safety of all parties, the permittee shall contact the Louisiana One Call System (1-800-272-3020) a minimum of 48 hours prior to the commencement of any excavation (digging, dredging, jetting, etc.) or demolition activity.
