Project No.: 01-2011-CUP

Date: 01-12-2011

Figure No.: 1

Notes

- The proposed layout is subject to change.
- Jurisdictional Wetlands and Other Waters of the US obtained from existing U.S.A.C.E. Jurisdictional Determination Account Number MVN-2010-02157-SY.
- According to F.E.M.A. F.I.R.M. Community Panel No. 22063C0500 D Dated 8-23-01, this property falls in Zone AE (Special Flood Hazard Areas Inundated By 100-Year Flood; Base flood elevations determined). Base Flood Elevation = 8' N.G.V.D.
- All camps have been and will be constructed in non-wetlands on piers.
- Camp construction has been and will be accessed from non-wetlands.
- All river structure construction such as boat slips, bulkheads, piers, elevated walkways, etc., have been and/or will be accessed from river.
- Specifically, all elevated walkways will be constructed from barge mounted boom arms with hydraulic pile driving attachments, which includes vegetated wetlands. Exact work areas will vary within rivers (see Fig. 19).
- Fully loaded barges will have a maximum draft of 3.5 feet, no prop washing will be necessary.
- All utilities have been and will be constructed in non-wetlands within the property boundary adjacent to the 50' servitude.
- No fueling facilities have been or will be located within facility.
- The "Proposed Triple Boat Slip" on the western boundary within the Petite Amite River constitutes all project excavation activity. Additionally, this native excavated material will be lawfully redistributed as "Bulkhead Backfill" along the Amite River Diversion Canal. No excavating or dredging will occur within the Amite River Diversion Canal.
- All unimpacted wetlands within the property boundary will be placed in a "conservation servitude" and lawfully recorded.
- Existing wooden piers/boat slips have elevated walkways whereas "proposed" do not.
- Bulkheads are proposed.

Total Proposed Fill

Approximately 1,983.33 Cubic Yards of Earthen Material.
Approximately 212.01 Cubic Yards of Concrete.
