Public Notice, MVN 2012-0123, dated April 16, 2012, described work proposed by RAM Terminals. The project proposes a coal export facility, located on the RDB of the Mississippi River, at about 61 miles above Head of Passes, in Myrtle Grove, Louisiana, in Plaquemines Parish.

The purpose of this addendum is to inform interested parties that the correct name of the applicant is RAM Terminals, LLC and the last paragraph on the first page of the April 16, 2012, public notice should read:

The proposed coal export facility will be located adjacent to an area previously identified as a recommended location for the Louisiana Coastal Area (LCA) Medium Diversion at Myrtle Grove with Dedicated Dredging ecosystem restoration project. That project is authorized by the Water Resources Development Act of 2007 and is intended to restore coastal wetlands in a critically effected area of the central Barataria Basin. Although a direct irresolvable conflict between the two projects has not been fully determined at this time, proposed features from both projects do have the potential for overlap.

Michael V. Farabee  
Chief, Eastern Evaluation Section
